# Your Solar Supply Chain Partner

Kinect Solar helps manufacturers, developers, EPCs, and asset owners manage solar equipment at scale, from port arrival and project deployment to inventory purchasing and liquidation.

For more than a decade, Kinect Solar has supported the U.S. solar market with integrated warehousing, transportation, inventory optimization, and equipment supply. Our expertise in solar and energy storage, backed by a flexible nationwide network, helps customers reduce risk, keep projects moving, and maximize equipment value throughout project lifecycles.

## Integrated solar and energy storage supply chain services

### Warehousing On-Demand

*Flexible capacity where and when project needs it.*

- Nationwide solar-ready warehouse network
- On-demand, short-term and long-term capacity
- Solar-specific receiving, inspection, and quality control
- BESS and hazmat capabilities

### Logistics & Transportation

*Coordinated movement from factory to warehouse, to project site.*

- Project-based transportation
- Specialized handling of solar equipment
- Handling BESS and hazmat equipment
- Flexible routing and sequencing aligned with project timelines

### Inventory Liquidation

*Options to turn excess inventory into recoverable value.*

- Channel-controlled resale to protect brand and pricing
- Cash, consignment, or profit-sharing
- Capital recovery and balance sheet optimization

### Equipment Wholesale

*Project-scale access to solar equipment when availability matters.*

- Bulk and pallet-based transactions
- Access to hard-to-find equipment
- Support for project gaps and urgent sourcing needs
- Competitive pricing

# Why Kinect Solar

Our solar-specialized expertise makes us the best partner to ensure compliant handling of solar equipment, excellent quality control, and traceability. Our customers rely on us to minimize risk and damage.
Kinect Solar is your one true partner across logistics, warehousing, and inventory decisions.

- For Manufacturers: Flexible U.S. distribution capacity, solar-specific handling, channel protection, and capital recovery.
- For Developers & EPCs: Schedule-aligned warehousing and delivery, scalable staging, and fewer handoffs from port to project.
- For IPPs, O&M, and Assets Owners: Long-term inventory control, equipment replacement support, lifecycle options for aging or surplus assets and facilitation of third party quality control.
